* **Conditional Formatting** :- Conditional formating is an Excel feature that automatically changes the appearance of cells based on specific conditions or rules.

It helps us identify important data easily by applying colors, data bars, Color Scales, & icons to cells.

(*) **Features of Conditional Formatting** :-
Go to Home → Conditional Formatting to access these features.

1. **Highlight Cells Rules** ⇒ Greater than, less than, Between, Equal to, Text that Contains, A Date Occuring, duplicate Values.

2. **Top / Bottom Rules** ⇒ Top 10 items, Top 10%, Bottom 10 items, Bottom 10%, Above Average, Below Average.

3. Data Bars ⇒ Displays horizontal bars inside cells based on the values. Larger values generally have longer bars.

4. Color Scales ⇒ Applies different colors to represent low, medium, and high values.

5. Icon Sets ⇒ Displays icons such as arrows, traffic lights, flags or symbols based on cell values.

6. New Rule ⇒ Creats your own conditional formatting rule using available options, including formulas.

7. Clear Rules ⇒ Removes conditional formatting rules from selected cells or an entire worksheet.

8. Manage Rules ⇒ Allows you to view, edit, delete, or change the priority and application range of existing rules.

(10) Uses of Conditional Formatting useful :-

> Quick Identification.
> Data Comparison.
> Error Detection.
> Better reports.
> Automatic Updates.

* Sorting in Excel:- It helps to arrange data in a specific order, making it easier to organize, compare, and analyze information.

(*) Key concepts learned :-

> Ascending Order (A to Z).

> Descending Order (Z to A).

(*) Example - How to perform department-wise Sorting.

1. Select the entire employee table including the column headings.
2. Go to the Data tab
3. Click Sort.
4. In the Sort by dropdown, select department.
5. Under Order, Select A to Z.
6. Click OK.

⁂ ⇒ Select the entire table rather than just the Department column so that employee name, salaries & other details remain correctly matched.
