Pivot Tables :-

It is a powerful tool used to Summarize, organize, analyze, & Compare large amounts of data Quickly without changing the original dataset. It helps us calculate totals, averages, maximum values, and minimum values, & counts based on Categories such as department, region, employee (or) City.

(*) Example: If a company has employee salary details, a Pivot Table can help us find:

- The total salary of each department.
- The maximum salary in each region.
- The average salary of each department.
- The number of employees in each city.

(*) Steps to Create a Pivot Table in Excel:-

1. Prepare the data.
2. Select the data manually.
3. Insert a Pivot Table ⇒
   > Go to the Insert tab.
   > Click PivotTable.
   > Check the selected table or data range.
   > Choose New Worksheet or Existing Worksheet.
   > Click OK.
4. Arrange the Pivot Table fields.
   It Displays the PivotTable fields panel with 4 main areas :-
   (1) Filters, (2) Columns, (3) Rows, (4) Values.
5. Drag & drop the fields.

(*) Example : Find the Total Salary of Each Department.

Employee Name	Department	Salary.
Kumar. M.	Training	10,000
Anjali. K.	Accounts	12,000
Smitha. R.	Marketing	11,250
R. Vasu	R&D	12,000
Kiran Kumar	Training	16,250
Jharna. S.	Accounts	6,400

> Steps to perform this task ⇒

1. Select any cell in your employee dataset.
2. Go to Insert → Pivot Table.
3. Select the required data range & click OK.
4. Drag Department into the Rows areas.
5. Drag Basic (BS) into the Values area.
6. Ensure the calculation is set to Sum.

> Output ⇒

Department	Sum of Basic Salary
Training	26,250
Accounts	18,400
Marketing	11,250
R&D	12,000
Grand Total	67,900

(*) Advantages of Pivot Tables :-

- Quick Analysis.
- Easy Comparison.
- Flexible Calculations.
- Dynamic Reporting.
- Less Manual work.
- Interactive Analysis.
